Training module: m-00-101 *timeware® system overview...*

An example of a simple timeware$^{®}$ system, with one attendance terminal, one access terminal and two timeware$^{®}$ clients. The SQL server and the timeware$^{®}$ services are installed on the timeware$^{®}$ server.

SQL server

timeware client

timeware server

e.g. IP:192.168.42.51

e.g. IP:192.168.42.200

timeware client

e.g. IP:192.168.42.52

timeware access terminal
e.g. IP:192.168.42.102

timeware attendance terminal
e.g. IP:192.168.42.101

An example of a more complex timeware® system. Four separate locations: one remote access, one remote attendance, a remote USB attendance and locally, both an access and attendance terminal.

In this example there is a separate SQL server with the timeware® services being installed on the timeware® server. Finally, there are two local timeware® clients and two remote PIP users at separate locations.

PIP User: 192.168.0.5   PIP User: 192.168.20.15

remote
access terminal
e.g IP: 211.23.8.6

remote
attendance terminal
e.g IP: 212.11.8.56
